

Dear FCC,I drive in New York City area traffic every work day and the information I receive from XM Instant Traffic is much better than the local stations and it is CONTINUOUS when it counts! There is nothing worse than finding out too late that the GWB or the Lincoln Tunnel is a mess. In the short time that XM has been providing this service I have come to rely on their information over the local stations. Please DO NOT take this service away from those of us that drive in NYC traffic! Thanks for your time.
